Problem Statement:
- Students who walk to class everyday face difficulties with getting lost, knowing what time they need to leave in order to arrive at their destination on time, and ensuring that they are taking the most efficient route. When beginning college, students are often left to just figure it out on their own without any real guidance or an in-depth understanding of how the campus is laid out thus causing extra and unnecessary tardiness, stress, and confusion.

Who is experiencing the problem?
- College students

What is the Problem?
- Students need to walk to class and having to put it into google maps/waze for every class is a hassle. Students often are late to class or take the least optimal way around campus, using roads instead of sidewalks and actual paths/shortcuts.

Where does the problem present itself?
- College/University campus'

Why does it matter?
- It matters because getting to class on time is vital for a student's success. Having an efficient way for a student to navigate their schedule and events of the day would be extremely helpful.
